Federal Order No. 36

VOL. XXII-NO. 1

C. MACK ENDSLEY, Market Administrator

JANUARY 1991

USDA Requests Proposals for Milk Inventory Management Study

The U.S. Department of Agriculture has requested comments from the public for a milk inventory management program to be studied by the secretary of agriculture as required by the recently enacted farm bill.

Keith Bjerke, executive vice president of USDA's Commodity Credit Corporation, said that the secretary is required to submit before August 1, a report on milk inventory management programs to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

The secretary is required to study a program which would establish an alternative classification of milk contained in section 8c(5) of the Agricultural Marketing Agreement Act of 1937 and a program which would support the income of milk producers through a system of established prices and deficiency payments.

Bjerke said the secretary also is required to study, after consulting

with Congress, other programs proposed by the public which the secretary deems appropriate.

The secretary is prohibited from studying any program that includes a milk production termination program similar to the Dairy Termination Program implemented in the 1985 farm bill.

Proposals must be received no later than February 6, 1991, by Charles Shaw, Commodity Analysis Division, ASCS, USDA, P.O. Box 2415, Washington, D.C. 20013.

Termination of Proceedings in Order 36

The USDA terminated a proceeding that was initiated to consider a proposal to rescind, for the months of December 1990 through February 1991, a temporary increase of the percentage of producer milk receipts that must be delivered to pool distributing plants

by pool supply plants and cooperative association handlers under the Eastern Ohio-Western Pennsylvania Federal Milk Order. The required shipping percentages were increased by five percentage points for the months of September 1990 through February 1991.

Because approximately 60 percent of the market's producer milk is used in Class I, and there does not appear to be any definite ongoing expansion in milk production, a shipping requirement of 35 percent for the months December 1990 through February 1991, should not cause any undue difficulty in pool qualification for any handlers committed to supplying the fluid milk market. In view of any lack of evidence of any substantive changes in the market's supply/demand conditions since mid-summer, it is concluded that the temporary revision of the order's supply plant and cooperative association shipping percentages is not rescinded.

November Milk Production

Milk production in the 21 major States during November totaled 10.0 billion pounds, 4 percent above production in these same States in November 1989, according to the Agricultural Statistics Board. October revised production, at 10.2 billion pounds,

was 4 percent above October 1989.

Production per cow in the 21 major States averaged 1,171 pounds for November, 39 pounds more than November 1989.

The number of cows on farms in the 21 major States was 8.55 million head, 12 thousand more than October 1990 and 23 thousand head more than

November 1989.

During the July-September period, the 21 major States produced 31.2 billion pounds of milk, 85.0 percent of the U.S. production. If producers in the remaining 29 States not surveyed monthly followed the same pattern as the 21 States, the U.S. production would be 11.8 billion pounds for November 1990.

FEDERAL ORDER 33 MARKET SUMMARY FOR DECEMBER 1990

Gross Class I utilization averaged 4,309,932 pounds per day during December 1990. On a daily basis this was a decrease of 4.0% from the previous month and 8.9% more than December 1989.^{1/}

The December 1990 Class I utilization of producer milk totaled 131,670,806 pounds or 55.8% of the reported producer receipts. This utilization percentage is 1.7% less than last month and 5.2% less than December 1989.^{1/}

The average butterfat test for gross Class I utilization was 2.1% for December 1990.

Receipts from 3,540 producers by 28 pool handlers regulated by Order No. 33 averaged 7,617,631 pounds daily for December 1990. On a daily basis this was 1.1% less than last month and 29.2% more than December 1989.^{1/}

Producers supplying the market decreased by 152 from the November 1990 total and increased by 679 from December 1989. The daily average producer receipts per farm of 2,152 pounds were 67 more than the previous month. On a daily basis this is 91 pounds more than December 1989.^{1/}

The December 1990 Class I price was \$12.52 per hundredweight for 3.5% milk delivered to pool plants in Zone 3. This was \$2.02 less than the November 1990 Class I price and \$3.39 less than the December 1989 price. Prices for Class I milk in parts of the marketing area other than Zone 3 reflect the specified location adjustment of minus 24 cents in Zone 1, minus 14 cents in Zone 2, plus 7 cents in Zone 4 and plus 15 cents in Zone 5.

The Class II price for December 1990 was \$8.77. This was \$2.51 less than the November 1990 Class II price and \$6.09 less than the December 1989 Class II price.

The Class III price of \$10.19 for December 1990 was 6 cents less than the previous month and \$4.74 less than the December 1989 Class III price.

The January 1991 Class I price will be \$12.29 for 3.5% milk.

^{1/} Comparisons to previous periods are magnified due to changes in the handlers included in the pool.

FEDERAL ORDER 36 MARKET SUMMARY FOR DECEMBER 1990

Gross Class I utilization averaged 5,098,257 pounds per day during December 1990. On a daily basis this was a decrease of 2.0% from the previous month and 7.5% more than December 1989.^{1/}

The December 1990 Class I utilization of producer milk totaled 158,045,961 pounds or 56.4% of the reported producer receipts. This utilization percentage is 4.6% less than last month and 3.5% less than December 1989.^{1/}

The average butterfat test for gross Class I utilization was 2.2% for December 1990.

Receipts from 4,723 producers by 35 pool handlers regulated by Order No. 36 averaged 9,040,331 pounds daily for December 1990. On a daily basis this was 6.1% more than last month and 1.8% less than December 1989.^{1/}

Producers supplying the market increased by 124 from the November 1990 total and decreased by 257 from December 1989. The daily average producer receipts per farm of 1,914 pounds were 61 more than the previous month. On a daily basis this is 65 pounds more than December 1989.^{1/}

The December 1990 Class I price was \$12.48 per hundredweight for 3.5% milk delivered to pool plants. This was \$2.02 less than the November 1990 Class I price and \$3.39 less than the December 1989 price.

The Class II price for December 1990 was \$8.77. This was \$2.51 less than the November 1990 Class II price and \$6.09 less than the December 1989 Class II price.

The Class III price of \$10.19 for December 1990 was 6 cents less than last month and \$4.74 less than the December 1989 Class III price.

The January 1991 Class I price will be \$12.25 for 3.5% milk.

^{1/} Comparisons to previous periods are magnified due to changes in the handlers included in the pool.
